## HEADQUARTERS UNITED STATES EUROPEAN COMMAND UNIT 30400 BOX 1000 APO AE 09128

ECJ4-PP 13 May 98

#### MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Minute for the USEUCOM Total Asset Visibility (TAV) Task Force meeting 6-8 May 98.

- 1. The USEUCOM TAV Task Force met 6-8 May 98 at Ramstein AB, GE. COL Henderson, HQ USEUCOM/ECJ4-PP, chaired the meeting. Purpose of the meeting was to update Task Force members on the latest DoD Automatic Identification Technology (AIT) Scenarios, educate node representatives, on what to expect from the Proof of CONOPS, distribute "Site Books" to node representatives, and Integrate SRA evaluation/evaluators into the Unit Move Scenario. Over sixty representatives from USEUCOM component commands and DoD agencies were in attendance.
- 2. The following are highlights of key issues and discussion items:
  - a. COL Henderson opened by complimenting the component representatives for a great job coordinating node representation at this meeting. 2ACR representatives were unable to attend. USEUCOM and USAREUR will coordinate a meeting with the appropriate 2ACR personnel on 16 May. Mr Han Holister will distribute "Site Books" to 1AD representatives. Representation from the participating nodes was very helpful for both the task force and the node representatives. It is important that the operators from each of the nodes understand what will happen during the operational prototype and their role in its successful execution.
  - b. COL Henderson emphasized the importance of full participation in the ensuing discussions. The operational prototype is a major expenditure of monies and the components made an investment in funding attendee's TDY. He also emphasized that all need to keep in touch and contact the USEUCOM AIT Task Force as questions develop. It is better to contact the TAV Task Force representatives than to develop work arounds and suboptimize the AIT prototype execution.
  - c. The DoD lead agents for the Unit Move, Aircargo, and Seavan Scenarios briefed their respective CONOPS. Lt Col Puntureri, ECJ4-PP, briefed the Ammo and Flyaway Scenarios.
    - i. Both container shipment companies, Lykes and SEALAND, will be used in the Seavan Scenario.
    - ii. The Southern leg of Air and Sea Scenarios is delayed until Sep. Norfolk CCP will not be instrumented until Aug and it is crucial to the Southern Scenarios.

#### UNCLASSIFIED

- iii. The Optical Memory Card (OMC) reader will be attached to the Business Process Server (BPS), not the Hand Held Terminal (HHT).
- iv. We need to identify who will be at Guardian Base in late July and ensure the test teams have the correct DoDAAC(s).
- v. The USS Eisenhower will not be in the AOR during the prototype execution. We are now planning to use the USS Enterprise as the end node for the Southern Air and Sea Scenarios. The Enterprise uses R-Supply instead of SUDAPS as its Automated Information System. If the Enterprise is indeed used, Navy must integrate AIT into the R-Supply system on the Enterprise.
- vi. The SMART Card for the PAX portion of the Unit Move is the same basic card as the one used for USAFE base supply. The card can be read by either system and can overwrite its own data onto the card.
- vii. NAVEUR will not be included in the Ammo Scenario and Ramstein AB is a confirmed participant. There is no projected ammo shipment within this FY, but we may test the infrastructure with an empty container in Aug. The Ammo prototype will occur when an actual ammo shipment is required.
- viii.Lukavak and Brcko are the finalized locations for the testing of the Flyaway kit. While the complete kit will include SMART Card technology, it will not be tested in the flyaway kit. USAREUR is the executive agent for procurement and maintenance of the kits during the test.
- ix. TC-AIMS II will field 3 teams of 2 persons. Each team will have a technician and a functional expert. An additional technician and two functional experts will be based out of the "white house" in Tuzla. Details are being worked out for emergency phone numbers for all equipment and systems.
- 3. The meeting generated several short and long term taskings. Taskings were reviewed on the afternoon of the 6<sup>th</sup> and the afternoon of the 8<sup>th</sup>. Taskings were distributed via e-mail and the USEUCOM AIT Web page on 11 May. The latest copy of the taskings is also included in these minutes.
- 4. USEUCOM POCs are Lt Col Carl Puntureri, LTC Brian Layer, MAJ Tom Pirozzi and Maj Rich Cordell, ECJ4-JMD/PP, 430-8284/8054. Anyone and everyone on the HQ USEUCOM TAV Task Force can be contacted via e-mail hot link on the ECJ4 AIT home page: <a href="http://www.eucom.mil/hq/ecj4/dodait.htm">http://www.eucom.mil/hq/ecj4/dodait.htm</a>,

or directly by e-mail: j4ait@hq.eucom.mil.

Copies of the 6-8 May briefings can be downloaded/viewed from the above listed web page.
